# TABLE OF CONTENTS

	Page
<b>CHAPTER 1. EXECUTIVE SUMMARY</b>	
Service Area Characteristics .....	1-1
Wastewater Characteristics .....	1-2
Treatment Requirements .....	1-4
Liquid Stream Alternatives .....	1-4
Liquid Stream Improvement Alternatives by Unit Process .....	1-4
Strategies for Treating Dry Weather Flows .....	1-6
Strategies for Treatment of Peak Flows .....	1-7
Solids Processing Alternatives .....	1-7
Recommended Plan .....	1-8
<b>CHAPTER 2. STUDY AREA CHARACTERISTICS</b>	
Study Area Location .....	2-1
Physical Environment .....	2-1
Topography .....	2-2
Geology and Soils .....	2-2
Climate .....	2-2
Socioeconomic Environment .....	2-3
Population Projections .....	2-4
Land Use .....	2-5
<b>CHAPTER 3. COLLECTION SYSTEM</b>	
Wastewater Collection System .....	3-1
System Description .....	3-1
Gravity Sewers .....	3-2
Emergency Overflows .....	3-2
Pump Stations .....	3-3
Condition Assessment .....	3-3
Infiltration and Inflow Analysis .....	3-4
EPA Guidance for Infiltration and Inflow .....	3-4
Estimation of I/I Contribution to Plant Flow .....	3-5
Existing I/I Removal Program .....	3-5
<b>CHAPTER 4. EXISTING WASTEWATER TREATMENT FACILITIES</b>	
WWTP Description .....	4-1
Influent Structure and Pump Stations .....	4-7
Headworks .....	4-7
Activated Sludge Aeration Basin .....	4-8
Secondary Clarifiers .....	4-8

## TABLE OF CONTENTS (continued)

	Page
Pressure Filtration System .....	4-9
Secondary Effluent Distribution Structure .....	4-9
Chlorine Contact Chamber .....	4-9
Outfall .....	4-10
Waste Activated Sludge Thickening .....	4-10
Aerobic Digestion .....	4-11
Biosolids Drying .....	4-11
Plant Utilities .....	4-11
Unit Process Capacity .....	4-12
Influent Pump Stations .....	4-12
Headworks .....	4-13
Aeration Basins .....	4-14
Aeration Equipment .....	4-14
Secondary Clarifiers .....	4-14
Pressure Filter System .....	4-15
Effluent Pump Station .....	4-15
Chlorine Contact Basin .....	4-15
Outfall .....	4-15
Return Activated Sludge Pumping .....	4-15
WAS Thickening .....	4-15
Aerobic Digestion .....	4-16
Digester Aeration Equipment .....	4-16
Biosolids Drying .....	4-16
WWTP Performance .....	4-16

### CHAPTER 5. WASTEWATER CHARACTERISTICS

Current Flows and Loads .....	5-1
Wastewater Flows .....	5-1
BOD and TSS Loads .....	5-9
Unit Loading Values .....	5-11
Flow and Load Projections .....	5-12
Flow Projections .....	5-14
Load Projections .....	5-14
Wastewater Characteristics Summary .....	5-14

### CHAPTER 6. WATER QUALITY AND REGULATORY REQUIREMENTS

South Santiam River Flow .....	6-1
South Santiam River Water Quality .....	6-2
Bacteria .....	6-3
Temperature .....	6-3
Dissolved Oxygen .....	6-7
Groundwater Regulations .....	6-9

## TABLE OF CONTENTS (continued)

	Page
Nuisance Phytoplankton .....	6-10
pH.....	6-11
Toxic Substances .....	6-11
Treatment Criteria.....	6-13
Current Discharge Permit .....	6-13
Reuse Treatment Requirements .....	6-14
Anticipated Treatment Requirements .....	6-16

### CHAPTER 7. LIQUID STREAM TREATMENT ALTERNATIVES

Categories of Improvements .....	7-1
Analysis of Liquid Stream Improvements by Unit Process.....	7-2
Raw Sewage Pump Station .....	7-2
Headworks .....	7-2
Grit Removal.....	7-5
Aeration Basins.....	7-6
Secondary Sedimentation .....	7-11
Filtration.....	7-14
Disinfection System.....	7-15
Outfall System .....	7-20
Effluent Pump Station.....	7-23
Odor Control .....	7-23
Strategies for Treatment of Dry Weather Flows.....	7-24
Dry Weather Strategy 1—Effluent Reuse.....	7-24
Dry Weather Strategy 2—Filtration and Cooling.....	7-27
Dry Weather Strategy 3—Subsurface Discharge to the River .....	7-29
Evaluation of Dry Weather Strategies .....	7-30
Strategies for Treatment of Peak Flows.....	7-31
Peak Flow Strategy 1—Peak Flow Attenuation Through Storage in Basins .....	7-31
Peak Flow Strategy 2—Conventional Treatment .....	7-32
Evaluation of Alternatives .....	7-33
Infiltration and Inflow Removal Cost Effectiveness Analysis .....	7-34
I/I Removal .....	7-34
Recommended I/I Reduction Program.....	7-36

### CHAPTER 8. SOLIDS PROCESSING ALTERNATIVES

Existing System .....	8-1
Biosolids Quality .....	8-2
Solids Management Alternatives .....	8-3
Treatment Level .....	8-3
Alternative 1—Lagoon Storage .....	8-4
Alternative 2—Dewatered Solids Storage.....	8-8
Alternative 3—Lime Stabilization.....	8-11

## TABLE OF CONTENTS (continued)

	Page
Evaluation of Alternatives .....	8-15
Cost Comparison.....	8-15
Non-Economic Evaluation.....	8-15
Summary .....	8-17
Recommendations.....	8-18

### CHAPTER 9. ENVIRONMENTAL EVALUATION

Alternative Strategies.....	9-1
Affected Environment/Environmental Consequences.....	9-2
On-Site Projects .....	9-2
Effluent Discharge System Improvements .....	9-7
Summary of Mitigation.....	9-13
Summary of Public Involvement .....	9-13
Conclusions on Environmental Impacts .....	9-13

### CHAPTER 10. RECOMMENDED PLAN

Recommended Process Improvements .....	10-1
Capital Improvement Plan .....	10-5
Basis for Cost Estimates .....	10-5
Capital Cost Summary .....	10-6

### CHAPTER 11. PROJECT FINANCING

Existing Costs .....	11-1
Projected Annual Costs.....	11-2
Capital Improvements.....	11-2
Financing .....	11-5
Pay-As-You-Go .....	11-5
Debt Financing.....	11-6
Recommended Financing.....	11-6
User Fees.....	11-6

### APPENDICES

Appendix A	Summary of Collection System Defects
Appendix B	Lebanon Wastewater Treatment Plant Current NPDES Permit and Mutual Agreement and Order (MAO)
